Subject: RE: Profiling of wastes

Thanks Joyce, we are thinking about the grouping too. Thanks for the heads up!

No response needed before Thanksgiving - My goal is to get you a formal letter of comments sometime on Wednesday. I just wanted you to begin thinking about it and I am available this week if we need to discuss it on the phone.

A related comment will be how to determine what drums have similar waste and can be grouped together for sampling purposes. This might include some kind of field testing like haz-cattng, visual observations, labels (if any), etc. Again, I am just mentioning it in an e-mail so you can start thinking about it. It will be included in the formal letter.

Thanks!

Subject: RE: Profiling of wastes

We'll work on a response to this question, Joyce – do you need this before Thanksgiving?

Dave

Subject: Profiling of wastes

Dear Dave and Tom – EPA will be writing a formal comment letter on the draft work plan. One thing we need to figure out, either as part of the work plan or as a task subsequent to the work plan, is how to profile the wastes and what

sampling data is required. We talked about this briefly during our meeting at the site on October 30th. If a waste is not RCRA-characteristic but still needs to go to an incinerator, what data will the incinerator need? Or if it is characteristic (e.g., D001 ignitable), what additional data would the incinerator need, if any?

Thanks!
